

When *Natural Paints* Get Best Grades They Are Usually Blue... ...or Yellow!

BEECK Mineral Paints – precious look and reliable protection for any mineral surface. Since 1894 made from natural minerals and potash waterglass, the prod-

Quality is naturally on top!

uct of quartz sand and potash. Perfectly supplemented by our AGLAIA Natural Paints from renew-

able plant-based raw materials. Ideal for universal wood treatment and for indoor wall and ceiling protection and design.

The positive Full Declaration of all the ingredients, no matter how small the quantity, provides safe protection against unwanted chemistry in your immediate environment. Furthermore, test results prove a careful selection of the raw materials and sophisticated manufacturing methods.

For more than 30 years, AGLAIA has been a synonym for wall paints, lacquers, glazes, oils, and waxes exclusively made from natural raw materials. A complete range of products proven successful indoors and outdoors, designed with all the experience to meet any application requirement. Everything for terrific results that last. Of course, in any color and with results that can't but convince. In all the tests listed, our products have been among the top products, three times even the only winner.

Altogether, clearly the winner!

Any further questions? Please let us know so we can assist you through one of our qualified AGLAIA dealerships or experts in your neighborhood.
